I'm a huge fan of CoD4, and I know some of you are too! There is so much customization on this game that it can be hard to decide what you want your account to look like. Well, I have the answer for you! Here's the easiest way to get what you're looking for. (Account creator name) has made an account making program for all versions of CoD4. It's easy to use and take care of everything in one go! You can find all the changes he made on his twitter page. (URL) (Account creator name) even spent an hour on the phone with me to make sure I was using it properly! That's dedication! I'm going to walk you through the steps of making your account. Just follow what I say and we should be all set. First off, you need to go to (URL). Click on the button and make sure you're signed in. If not, do so and continue reading. Next, click the "Make Account" tab at the top of the screen. Here is where we can get started! Now that we're here, we need to get all our options laid out before starting this process. On the left side of the page, click on "Customization" which will pull up a bunch of stuff. We need to set everything out before continuing. Make sure you have all your options properly set before continuing. Check out this image to make sure you are ready! If you are, look at the bottom right corner of the screen. It should say "Account is ready to make". When it says that, it's time to press that big red button! When you press that button, this will start creating your account. Don't touch anything on your computer during this process. It may take a minute or two. Once it's ready, you will see a big green button that says "Make Account" which will be in the same place as where the red button was. Press it and continue reading! We are almost done! Now, you should go to (URL) and make sure that your account was accepted. If it did not work, message him on twitter with the error message that pops up. If you get an error message, you're account wasn't accepted! This can be for multiple reasons including but not limited to: 1) Not following every step correctly. Please reread everything carefully. 2) Not being registered with the editor. Please read the instructions at the top of this article to do so. 3)) Account already exists. CoD4 doesn't allow duplicate accounts, so you'll have to try making a new one. If your account was accepted, you are ready to go! Continue reading! If it was not accepted, try again with a new account or ask on twitter for help if you're really stuck.
