

Who was the first to use the computers? Another cute and minimalistic password protection soft that will hide all your files and folders. You can keep confidential all your passwords, bank account details, private messages or any critical and hidden data. Imagine this : Everytime you install it and restart your computer, you will be asked to create a temporary password before even using it, so you will never be in a position to try to use any of your files or folders or secure your computer as if it were your mother, brother, friend, coworker... It has been made with attention to detail for a great user experience, in order to create a password protection that will stay out of the way, useful, pretty and not present. Let's keep it SECRET since a security password is not enough to keep your computer private. INTRODUCTION: What is Revosoft Cach? Revosoft Cach is a program that comes in the form of a few files (installer, task manager etc.). There is no Internet connection needed to install or to run Revosoft Cach. It will hide all types of files and folders of the computer. Revosoft Cache hiding your files and folders is a software that is used to encrypt all types of files and folders in order to protect them against unauthorized access. When you hide folders with Revosoft Cach, you create a temporary password and so it will be impossible for anybody to decrypt the data hidden in the file you select. Revosoft Cache hides folders by encrypting them with 128-bit AES encryption. This is the highest encryption standard currently available on the market today. Hide folders from all disks of the system (C:, D:, E:, etc). Unlimited amount of folders to hide. No need to be running to work. Light size and intuitive interface. See more screenshots below COMPATIBILITY: You do not need to be connected to the internet to work with Revosoft Cache, because it runs on its own for the duration of time you select. HIDING METHODS: Revosoft Cache uses one of the most sophisticated methods of hiding folders and files. Revosoft Cach uses password protection to hide all files and folders on your computer. ORGANIZATION: When you select a file to be hidden with Revosoft Cache, you can select one of the following hiding methods: \* Password protection (where you need to

Revosoft Cache Cracked Accounts acts like a cache for MS Windows folders and blurs files/folders on your computer. Do you want to know why you should hide folders? Get your folder's disk space back and prevent other users from accessing your sensitive data!- Put your files and folders on hidden, secured side of your hard drive- Protect your privacy when using internet - You can open web pages, but other users cannot open folders on your computer(though, you can still open files)- Win key + L keys No longer will you need Alt + Del to gain administrator rights(you can only use the main Administrator account), and there is no option to turn it off!- When you hide folders and files on your computer, your data will be virtually impossible to find in case of system failure, theft, or when someone is illegally snooping on your computer. Do you want to prevent everyone from reading your files?- You do not need to enter a password to access your files in the future- RevoSoft Cache is a FREE utility and will not slow down your system- There is NO extra registry modifications, no necessary software installation or hidden files in your windows folder- RevoSoft Cache allows you to easily hide folders on your computer without complicated instructions.
