I think this loco is a must-have addition to the Chengdu-Suining route as it goes even faster than that one which comes with the route. I don't know about the accuracy but I think that the visuals and sounds are great. I just have a minor complaint about the "Light lens flare effects" that are very basic and spoil the lighting impression a bit (coolest headlights ever). And also I'm suprised there's no advanced cruise control just like the slower loco has. Just a simple speed limiter. But these are just a minor drawbacks.. It's a decent game...

It is fun to play but can be very hard to find a game at the most popular of times.

I would suggest buying this game to play it with a friend because 1v1s are very fun.

The only problem is the zombies gamemode does not work..

. Bottom line - WAY WORTH THE MONEY. Bug free and lots of content.

Positives: Enough to do of enough kinds that its hard to get bored. Survival mechanics, crafting of all kinds, fishing, farming, quests, and puzzles. And its all profitable if you bother with it. Card game too. The open world is seriously huge. There is a contiguous underworld. But you can fast travel if you like. Lots of recruitable characters. Steam achievements equate to in-game, permanent stat increases. I haven't beat the game yet, but there is a new game+ option on clear.

Neutrals: There's a unique feature where you can switch a characters class at any time, shuffling their abilities accordingly to suit a situation. For example you can play your main as a tank, healer, or glass-cannon. Take your pick. I really like it, but this might irritate purists. The story has some unique elements. In the end you're still roaming the world and killing big-bads, but without spoiling too much, you're not a very nice guy, and up against a threat that is different from the standard angel and demon archetypes.

Negatives: Again, I haven't beat the game, but there doesn't appear to be progression of any sort with weapons - no associated vendors, finds, or crafting recipes. This appears to be an intentional part of the final build as leveling is sufficient to maintain attack at a high enough level to contend with enemies. For such a thoroughly complete and expansive game, this is an otherwise mystifying choice by the developer. The interface is workable, but not very good. One or two many button clicks to do some basic stuff.

Negatives aside, this is overwhelmingly a worthwhile add to your library. Honestly feels kind of like Skyrim ported over to RPG maker. I'm having lots of fun.. Another garbage game that was greenlight. Welcome to the collection of garbage games Into the War where Air control, zen fish simulator, Forsaken Uprising, slaughtering ground, grass simulator and many other garbages games will make steam look like google play in the future. Hahaha!

This game is so terrible. So terrible it's a little funny. I got it on an amazing pack for a dollar, only got the pack for the other games.

Do NOT buy this!. An absolutely TIMELESS classic that is still memorable to this very day. The remake of this gem is looking fantastic thus far (Due to my PC not being back at 100%, it's causing small bits of "lag" which REALLY annoy me as they make the "after book shelf" part <being vague to avoid spoilers to those who are new to the story, the rest should know the part i'm referring to fully well.>, thus not having the title run fluidly as it would back when my PC was MUCH more stable back in 2016, ah well, guess i'll have to wait until my PC is back at 100% to get the True Full Ending <The extra "self insight" that is given when one doesn't save ONCE, with the exception of the Hall of Illusions where, as long as one doesn't read the note before it, they can save ONLY in that hall, thus making the True Full Ending much more doable.>, ah well.) and i'm reloving it once more. <3 The scares for first-timers will hit home BIG TIME, just as it did for me all those years ago. ^^

Definitely a 10/10, though I think we can all agree that said True Ending could've been expanded upon, but I suppose that's what fics are for, so no worries there. :>. Very nice danmaku. I like the idea of the switching modes, when you chose what kind of

bullets you are invincible for, i believe it's pretty novel. The sound is awesome. The graphics is reasonably good, though nothing special.

IZI MODO is decent; there are enough lifes and credits to finish the game after a bit of learning. I am not sure I like the 'rank' system, when the game complexity increases if you do not lose life for a while, but I do not have any problems with that.

The game might use some touhou-ish polish, indeed, but otherwise it is a very good, solid game. I'd give it may be 8.5/10..

very game made me angry. My favorite furrie con shooting simulator

This is a poor reskin of the 377 in London to Brighton not even worth \u00a330.50 dont buy this!. Needs a resolution option.. I really recomend this game :D. This loco is essentially what Jeremy Clarkson would want to drive if Top Gear was about trains...

Class 70's are quite a common sight for me nowadays - I live not far from a Depot where at least two or three 70's in Colas Rail Livery will be stationed. But personally, the Freightliner livery as seen here suits them much better. And dear God what a loco...

The detailing is absurd, the sound effects (including two-tone horn!) are fantastic and this pack just comes with so much content for such a little price. You get the 70's themselves, Freightliner-liveried 47's (the ones with updated sound effects), Container Wagons, MJA Ballast Wagons, TEA Fuel Wagons, and a big bag of scenarios.

Some are for the default 70 on the WCML - the only complaint I have about this pack is these though. Despite having a 70 quite out of place amongst the Intercity HST's & 86's, they just feel a bit... too similar to me. Just drive from Glasgow to Carlisle\vice-versa - it's not very exciting... heck, I'm writing this Review while playing on of these - simple case of 'Once out of Glasgow, open throttle and sit back'. But you do get at least 7 or 8 Bonus Scenario's for the GWML & Hedborough North that involve the MJA & TEA Wagons, usually hauled by 37's or 47's. That's at least a Baker's Dozen of scenarios - enough to keep any rail enthusiast busy!

So overall, this comes highly recommended by me. Great loco, wonderful rolling stock, loads of scenarios & all for that price? I say you go and get it - no need to wait for a Sale, it's that brilliant after all.. Amazing game.. A very poor design and very badly implemented. Shame on you designers for producing such crap. 4 out of 10 for the lacklustre effort
